Sir,

**SUB:-** JNTUHUCESTH-CIVIL-ICS- STRUCTURAL STABILITY REPORT FOR  
THE **MAHARISHI VIDYA MANDIR**, GIRISH PARK, NEAR HI-TECH CITY,  
KONDAPUR, R.R.DIST, HYDERABAD - REG.

Ref:- Your Lr.No.-nil-, dated. 24.06.2024

--- \* ---

The Principal of the **MAHARISHI VIDYA MANDIR**, has approached JNTUH UCESTH to issue the structural stability report for the school building located in Girish Park, Near Hi-tech City, Kondapur, R.R.Dist, Hyderabad-500084.

Accordingly an expert namely Dr.B.SivaKonda Reddy. Professor in Civil Engineering Department, JNTUH UCESTH and this team have visited the site on 02.07.2024. The school campus consists of 1. Main building with RCC Framed Ground+1 Floor structure, which is about 25 years old & 2. The New Block with G+3 Floors building with RCC framing and it is learnt that the building was constructed in the year 2014. The both buildings were inspected thoroughly and there were no any signs distress in the both buildings.

After verifying & checking the Structural drawings and based on the NDT tests (like UPV and Rebound Hammer test) conducted on the both buildings (like column, beam & slab) in all the floors, it is concluded that the both buildings i.e. Main building & New Block building are **structurally sound, safe and stable in their present form and usage**. However, there should be no overloading on the existing floors and any change in the usage of the present floors in the future is not recommended.

In case of any clarifications you may please contact us.

Yours sincerely
